Mock Sprint Requirements - Group 77

Prepared by: JH Jahan Haidari (BA)

Date: 06/08/2026

Team: Group 77

1. Login page requirements

1.1 Scope

THINGS TO KEEP IN MIND: Styling changes ONLY. Do NOT modify authentication logic, validation, or session handling. The existing login functionality must remain unchanged.

1.2 What to style

	≡ Element	≡ Reason
1	Login form layout	Cantered on the page with appropriate spacing
2	Username/email field	Standard input field with a label
3	Password field	Standard input field with a label
4	Login button	Visually distinct, clickable, with hover effect
5	Background	Clean, professional design and easy to contrast from labels
6	Error messages	Existing error messages re styled in (red text, clear visibility)
7	Logo & Header	Include team name or logo at the top

1.3 What NOT to touch

	≡ Element	≡ Reason
1	Login form validation logic	Must remain functional
2	Authentication flow	Must remain functional
3	Session handling	Must remain functional
4	Database queries	Must remain functional

2. Team page requirements

2.1 Overview

After successful login, users should be redirected to a TEAM DASHBOARD displaying all team members with their roles and information.

	Field	Required?	Validation rules	Display rules
1	Team name	Yes	Cannot be empty	Display as heading at the top of page
2	Member name	Yes	Cannot be empty	Display as heading below profile photo
3	Member role	Yes	Cannot be empty	Display below name e.g, PM, BA, DEV, UX
4	Member photo	Optional	Must be valid image url	If missing, display placeholder avatar
5	Short blurb	Optional	max character 200	If missing, display nothing

Team: Group 77

3. User flow

4. Edge cases

5. Non functional requirements

	☰ Requirement	☰ Details
1	Responsive	Page should work on desktop and mobile
2	Fast loading	Team page should load in under 3 seconds
3	Visual consistency	Login page and team page should look like they belong together essentially similar styles
